

Nehru Gram Bharati (Deemed to be University)
Prayagraj, Uttar Pradesh , INDIA

Syllabus

[As per NEP-2020 Regulations]

Bachelor of Science (Honours)/(Honours with Research)
in
Zoology

[Department of Zoology]

[Effective From 2023-24 Onwards]

Board of Studies

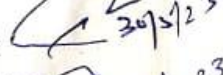

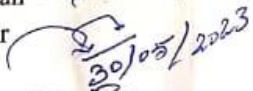

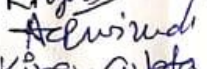

Dated: 30-05-2023

1. Dr. Asheesh Shivam, Head, Dept. of Zoology, NGB (DU), Chairperson
2. Dr. Rudra P. Ojha, Asso. Professor, Dept. of Zoology, NGB (DU), Member
4. Dr. A.C. Dwivedi, Assistant Professor, Dept. of Zoology, NGB (DU), Member
5. Dr. Kiran Gupta, Asst. Professor, Dept. of Zoology, NGBDU, Member
6. Dr. Sukrat Sinha, Asst. Professor, Dept. of Zoology, NGBDU, Member.
7. Prof. S.K. Malhotra, Dept. of Zoology, University of Allahabad, Prayagraj (External Subject Expert)
8. Prof. Prakash Nautiyal, Dept. of Zoology, HNB Garhwal University, Srinagar (External Subject Expert)

Minutes of Board of Studies Meeting

Board of Studies (BoS) of the Department of Zoology, Nehru Gram Bharati (Deemed to be University), Prayagraj is called to meet on **30.05.2023**, Tuesday of May, 2023 at Shashi Campus, JhuthiTali, Prayagraj.

Members Attending (with signature & date):

- | | | |
|---|----------|---|
| 1. Dr. Asheesh Shivam, Head, Dept. of Zoology, NGBDU | Chairman |  |
| 2. Prof. S.K. Malhotra, Dept. of Zoology,
Department of Zoology, University of Allahabad | Member |  |
| 3. Dr. Rudra P. Ojha, Asso. Professor, Dept. of Zoology, NGBDU | Member |  |
| 4. Dr. A C. Dwivedi, Asst. Professor, Dept. of Zoology, NGBDU | Member |  |
| 5. Dr. Kiran Gupta, Asst. Professor, Dept. of Zoology, NGBDU | Member |  |

Members Absent:

- | | |
|---|--------|
| 1. Prof. Prakash Nautiyal, Dept. of Zoology,
Department of Zoology, HNB Garhwal University, Srinagar | Member |
| 2. Dr. Sukrat Sinha, Asst. Professor, Dept. of Zoology, NGBDU | Member |

The following resolutions were made during the meeting:

1. The committee has approved syllabus of National Education Policy (NEP-2020) at under graduate level (UG Programme) with some suggestions and modifications.

The meeting was concluded Vote of thanks offered by Chairman of the committee.

Enclosures:

1. *Approved syllabus*

Dr. Asheesh Shivam
Head, Department of Zoology
N.G.B. University, Allahabad

Introduction of the Programme:

[a] Introduction:

The NEP-2020 offers an opportunity to effect a paradigm shift from a teacher-centric to a student-centric higher education system in India. It is based on Outcome Based Education, where the Graduate Attributes are first kept in mind to reverse-design the Programs, Courses and Supplementary activities to attain the graduate attributes and learning outcomes. The learning outcomes-based curriculum framework for a degree in B.Sc. (Honours/Honours with Research) in Zoology is intended to provide a comprehensive foundation to the subject and to help students develop the ability to successfully continue with further studies and research in the subject while they are equipped with required skills at various stages. The framework is designed to equip students with valuable cognitive abilities and skills so that they are successful in meeting diverse needs of professional careers in a developing and knowledge-based society. The curriculum framework takes into account the need to maintain globally competitive standards of achievement in terms of the knowledge and skills, as well as to develop Scientific temper, spirit of enquiry, problem solving skills and human and professional values which foster rational and critical thinking in students.

[b] Graduate Attributes:

Type of learning outcomes	The Learning Outcomes Descriptors
Learning outcomes that are specific to disciplinary/interdisciplinary areas of learning	Disciplinary/ interdisciplinary Knowledge & Skills
Generic learning outcomes	<i>Critical Thinking & problem-solving Capacity</i>
	<i>Creativity</i>
	<p><i>Communication Skills:</i> The graduates should be able to demonstrate the skills that enable them to:</p> <ul style="list-style-type: none"> ● listen carefully, read texts and research papers analytically, and present complex information in a clear and concise manner to different groups/audiences, ● express thoughts and ideas effectively in writing and orally and communicate with others using appropriate media, ● confidently share views and express herself/himself, ● construct logical arguments using correct technical language related to a field of learning, work/vocation, or an area of professional practice, ● convey ideas, thoughts, and arguments using language that is respectful and sensitive to gender and other minority groups.
	<p><i>Analytical reasoning/thinking:</i> The graduates should be able to demonstrate the capability to:</p> <ul style="list-style-type: none"> ● evaluate the reliability and relevance of evidence; ● identify logical flaws in the arguments of others; ● analyze and synthesize data from a variety of sources; ● draw valid conclusions and support them with evidence and examples, and address opposing viewpoints.

Research-related skills: The graduates should be able to demonstrate:

- a keen sense of observation, inquiry, and capability for asking relevant/ appropriate questions,
- the ability to problematize, synthesize and articulate issues and design research proposals,
- the ability to define problems, formulate appropriate and relevant research questions, formulate hypotheses, test hypotheses using quantitative and qualitative data, establish hypotheses, make inferences based on the analysis and interpretation of data, and predict cause-and-effect relationships,
- the capacity to develop appropriate methodology and tools of data collection,
- the appropriate use of statistical and other analytical tools and techniques,
- the ability to plan, execute and report the results of an experiment or investigation,
- the ability to acquire the understanding of basic research ethics and skills in practicing/doing ethics in the field/ in personal research work, regardless of the funding authority or field of study.

Coordinating/collaborating with others: The graduates should be able to demonstrate the ability to:

- work effectively and respectfully with diverse teams,
- facilitate cooperative or coordinated effort on the part of a group,
- act together as a group or a team in the interests of a common cause and work efficiently as a member of a team.

Leadership readiness/qualities: The graduates should be able to demonstrate the capability for:

- mapping out the tasks of a team or an organization and setting direction.
- formulating an inspiring vision and building a team that can help achieve the vision, motivating and inspiring team members to engage with that vision.
- using management skills to guide people to the right destination.

'Learning how to learn' skills: The graduates should be able to demonstrate the ability to:

- acquire new knowledge and skills, including 'learning how to learn' skills, that are necessary for pursuing learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social, and cultural objectives, and adapting to changing trades and demands of the workplace, including adapting to the changes in work processes in the context of the fourth industrial revolution, through knowledge/ skill development/reskilling,

- work independently, identify appropriate resources required for further learning,
- acquire organizational skills and time management to set self-defined goals and targets with timelines.
- inculcate a healthy attitude to be a lifelong learner,

Digital and technological skills: The graduates should be able to demonstrate the capability to:

- use ICT in a variety of learning and work situations,
- access, evaluate, and use a variety of relevant information sources,
- use appropriate software for analysis of data.

- **National & International Perspective considering the current perspective of a Global Village.**

Value inculcation: The graduates should be able to demonstrate the acquisition of knowledge and attitude that are required to:

- embrace and practice constitutional, humanistic, ethical, and moral values in life, including universal human values of truth, righteous conduct, peace, love, nonviolence, scientific temper, citizenship values,
- practice responsible global citizenship required for responding to contemporary global challenges, enabling learners to become aware of and understand global

<p>issues and to become active promoters of more peaceful, tolerant, inclusive, secure, and sustainable societies,</p> <ul style="list-style-type: none"> • formulate a position/argument about an ethical issue from multiple perspectives • identify ethical issues related to work, and follow ethical practices, including avoiding unethical behaviour such as fabrication, falsification or misrepresentation of data, or committing plagiarism, and adhering to intellectual property rights, • recognize environmental and sustainability issues, and participate in actions to promote sustainable development.
<p>Autonomy, responsibility, and accountability: The graduates should be able to demonstrate the ability to:</p> <ul style="list-style-type: none"> • apply knowledge, understanding, and/or skills with an appropriate degree of independence relevant to the level of the qualification, • work independently, identify appropriate resources required for a project, and manage a project through to completion,
<p>Environmental awareness and action: The graduates should be able to demonstrate the acquisition of and ability to apply the knowledge, skills, attitudes, and values required to take appropriate actions for:</p> <ul style="list-style-type: none"> • mitigating the effects of environmental degradation, climate change, and pollution, effective waste management, conservation of biological diversity, management of biological resources and biodiversity, forest and wildlife conservation, and sustainable development and living.
<p>Community engagement and service: The graduates should be able to demonstrate the capability to participate in community-engaged services/ activities for promoting the well-being of society.</p>
<p>Empathy: The graduates should be able to demonstrate the ability to identify with or understand the perspective, experiences, or points of view of another individual or group, and to identify and understand other people's emotions.</p>

[c] Flexibility:

The programmes are flexible enough to allow liberty to students in designing them according to their requirements. The Learner is given freedom of choice in selecting disciplines. Students may select his/her own stream. He/She may select three major disciplines from his/her own stream or two major disciplines from his own stream and one major discipline from any other stream. Along with major disciplines, a student can select minor disciplines from other streams, languages, generic electives, ability enhancement courses, Vocational/Skill Enhancement Courses (SEC) and Value added Courses including Extra Curricular activities.

Multiple Entry & Exit Options:

EXIT OPTIONS	Credits Required
Certificate upon the Successful Completion of the First Year (Two Semesters) of the multidisciplinary Four-year Undergraduate Programme. [NSQF Level 5]	44
Diploma upon the Successful Completion of the Second Year (Four Semesters) of the multidisciplinary Four-year Undergraduate Programme. [NSQF Level 6]	88
Basic Bachelor Degree at the Successful Completion of the Third Year (Six Semesters) of the multidisciplinary Four-year Undergraduate Programme.	136
Bachelor Degree with Honours/Honours with Research in a Discipline at the Successful Completion of the Fourth Year (Eight Semesters) of the multidisciplinary Four-year Undergraduate Programme.	180

Pre requisite

To study Zoology in undergraduate, a students must have studies Biology in 12 standards

The aim and objective of the B.Sc. Zoology programme

PO1 To provide knowledge to the students about working principles, design guidelines and experimental skills associated with different fields of Zoology.

PO2. To provide knowledge many job and self-employment oriented course such as Genetics and Cell Biology, Biochemistry, Molecular Biology, Biotechnology, Economic Zoology etc.

PO3. To educate about conceptual and practical knowledge of the Ecology, Biostatistics, Biodiversity, Physiology, Endocrinology, Developmental Biology, Biochemical Techniques, Animal tissue culture e

PO4. To aware the students with scientific and technological knowledge for uplifting and improvement of the social and environmental health in the rural areas

SEMESTER-I
B.Sc. (Honours/Honours with Research) in Zoology

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. First Year	Semester: I
Pedagogy:			
Course Code:		Course Title: Animal Diversity-I	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Describe unique characters and diversity of Protozoa and Porifera and type study CO.2 Describe unique characters and diversity of coelenterate and Platyhelminthes type study CO.3 Describe unique characters of and Aschelminthes and Annelids type study CO.4. Describe unique characters of arthropods and Mollusca life functions of the organisms CO.5 Describe unique characters of echinoderms and its life functions. Hemichordates life, functions of the organisms belong to this groups			
Credit (L+T+P): 2+0+2		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials +Practical): 30+0+60			
Unit:	Topics	No. of Lectures	
Unit I.	General Classification of non-chordate phyla upto classes. Functional morphology of type forms. Protozoa - Type study: <i>Trypanosoma</i> , <i>Euglena</i> , <i>Paramecium</i> -structure, nutrition, life cycle	6	
Unit II	Porifera - Type study: <i>Sycon (Scypha)</i> -Structure, Nutrition and Life cycle, Canal system in sponges, cell types, spicules Cnidaria - Type study: <i>Obelia</i> , Polymorphism, Alternation of Generation, Coral reefs.	6	
Unit III	Platyhelminthes - Type study: <i>Echinococcus</i> - Structure, Life cycle, Parasitic adaptations in helminths. Adhesive organs in Trematoda & Cestoda, Larval forms in Nematomoda Aschelminthes - Type study: <i>Woucheria bancrofti</i> - Structure, Life cycle, Annelida - Type study: <i>Nereis</i> , Metamerism & Trochophore	6	
Unit IV	Arthropoda-Type study: <i>Palaeomon</i> - Morphology, Nutrition, Respiration, Reproduction, Insect Metmorphosis. Mollusca- Type study: <i>Pila, Unio</i> - Morphology, Nutrition, Respiration, Reproduction Torsion in Gastropods	6	
Unit V	Echinodermata - Type study: <i>Asterias</i> - Morphology, Nutrition, Respiration, Reproduction, Water vascular system.	6	
Suggested Readings: 1. Barnes, RD: Invertebrate Zoology (4th ed.), Holt-Saunders, 1980. 2. Barrington, EJW: Invertebrate Structure and Function, Nelson, 1987. 3. Hickman, Roberts & Hickman: Integrated Principles of Zoology (7th ed) Times-Mirror, Mosby, 1984. 4. Iyer: A Manual of Zoology, Part I. Viswanathan, 1973. 5. Kotpal, RL: Modern Text Book of Zoology: Invertebrates, Rastogi Publications, 12th edition, 2019 6. Marshall & William: Text Book of Zoology, Vol I (Parker & Haswell, 7th ed.) Macmillan, 1972.			
Course prerequisite: To study this course, the students must have had subject biology in class 12 th			
Suggested continuous Evaluation methods-			
Continuous internal Evaluation shall be based on allotted assignments and class text. The marks shall be as follows: Internal examination :10 Assignment/Practical/Project : 5 Attendance/Behaviour : 5

2. Invertebrate Practical	- S.S. Lal	
3. Verma P.S., P.C. Srivastava	- Practical Zoology, S. Chand & Co.	
Suggested continuous Evaluation methods-		
Continuous internal Evaluation shall be based on allotted assignments and class text.		
The marks shall be as follows:		
Internal examination	:10	
Assignment/Practical/Project	: 5	
Attendance/Behaviour	: 5	

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. 1st Year	Semester: Ist
Pedagogy:			
Course Code: ZOOIKS-2301		Course/Paper Title:	Introduction to Indian Knowledge System
Course Outcomes: After completing this course, the students will be able to -			
CO 1: explain the the foundational Concepts & Principles of IKS.			
CO 2: explain the historical development and evolution of Indian Intellectual traditions.			
CO 3: explain the knowledge key texts, thinkers, and schools of thought within the IKS.			
CO 4: analyze the interdisciplinary nature of Indian knowledge, integrating philosophy, spirituality, science, arts, and literature though the study of IKS.			
CO 5: explain the holistic and multidimensional nature of Indian Thought.			
Credit: 03		Paper (Core Compulsory / Elective): Core Compulsory	
Max. Marks : 20 + 80			
Total Number of Lectures (Lecture – Tutorials – Practical): 45 + 0 + 0			
Units:	Topics		No. of Lectures
I	Introduction to Indian Knowledge System <ul style="list-style-type: none"> • Definition, Concepts and Scope of IKS • IKS based approache on Indian Knowledge System & Role of Guru (teacher) • Understanding the concepts of dharma, karma, and the four purusharthas (goals of life) 		09
II	Vedic Knowledge and Philosophy <ul style="list-style-type: none"> • Study of the Vedas, including the Rigveda, Yajurveda, Samaveda, and Atharvaveda • Introduction to Upanishads and their metaphysical and philosophical teachings • Analysis of the six orthodox (astika) schools of Indian philosophy (e.g., Nyaya, Vaisheshika, Yoga, Samkhya, Mimamsa, and Vedanta) 		09
III	Unit 3: Spiritual and Mystical Traditions <ul style="list-style-type: none"> • Exploration of Hindu spiritual traditions, including Bhakti, Karma, Jnana, and Raja Yoga • Study of Advaita Vedanta and its nondualistic philosophy • Introduction to other spiritual paths like Tantra and Sufism in the Indian context 		09
IV	Scientific and Technological Advancements <ul style="list-style-type: none"> • Examination of ancient Indian contributions to mathematics, astronomy, and medicine • Study of scientific treatises such as Aryabhatiya, Sushruta Samhita, and Charaka Samhita • Exploration of the Indian concept of time, measurement, and cosmology 		09
V	Indian Arts, Literature, and Aesthetics <ul style="list-style-type: none"> • Analysis of Indian classical music, dance, and theater traditions • Study of classical Sanskrit literature, including the works of Kalidasa and Valmiki • Understanding the concept of rasa (aesthetic experience) and its manifestations in Indian arts • Modern Interpretation and Contemporary Relevance 		09
Suggested Readings:			

- "Indian Philosophy: A Very Short Introduction" by Sue Hamilton
- "A History of Indian Philosophy" by Surendranath Dasgupta
- "Indian Philosophy: A Critical Survey" by Chandradhar Sharma
- "India: A History" by John Keay
- "The Wonder That Was India" by A.L. Basham
- "Ancient India" by R.S. Sharma
- "The Oxford History of India" edited by Percival Spear
- "A History of Indian Literature" (multiple volumes) by Sisir Kumar Das
- "Indian English Literature" by M. K. Naik
- "The Norton Anthology of World Literature: India, Pakistan, and Bangladesh" edited by Sarah Lawall
- "Indian Art" by Partha Mitter
- "The Art and Architecture of the Indian Subcontinent" by J.C. Harle
- "Indian Architecture: Buddhist and Hindu Period" by Percy Brown
- "The Crest of the Peacock: Non-European Roots of Mathematics" by George Gheverghese Joseph
- "Indian Science and Technology in the Eighteenth Century" by Dharampal
- "Raga Mala: The Autobiography of Ravi Shankar" by Ravi Shankar
- "The Ragas of North India" by Walter Kaufmann
- "The Complete Book of Ayurvedic Home Remedies" by Vasant Lad

- "The Heart of Yoga: Developing a Personal Practice" by T.K.V. Desikachar
- "The Yoga Sutras of Patanjali" translated by Swami Sachidananda

Suggested continuous E-Valuation Methods –

Continuous Internal Evaluation (CIL)

Total marks for each course shall be based on internal assessment (20%) and semester end examination (80%). The internal assessment of 20% shall be distributed as under:

- (i) Internal Class Test – 10%.
- (ii) Assignment/Project/Practical – 5%
- (iii) Attendance/Behavior – 5%.

Other Courses:

Minor : To be Chosed from POOL B

Skill Enhancement Course (SEC) : To be Chosed from POOL C

Value Added Course : To be Chosed from POOL D

SEMESTER-II

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. First Year	Semester: II
Pedagogy:			
Course Code: ZOO-23102		Course Title: Animal Diversity-II	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Understand unique characters of Urochordates, cephalochordates CO.2 Understand unique characters of fishes and type study CO.3 Understand unique characters amphibian and reptiles and their features CO. 4 Understand unique characters of birds and their migration features CO.5 Understand unique characters of mammals			
Credit (L+T+P): 3+0+2		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials +Practical): 45+0+60			
Unit:	Topics	No. of Lectures	
Unit I.	Introduction to Chordata: General characters and classification up to Classes, Hemichordata- <i>Balanoglossus</i> : Morphology and development: <i>Herdmania</i> : Morphology, blood vascular system, reproductive system and development	9	
Unit II	Cephalochordata: <i>Branchiostoma</i> (= <i>Amphioxus</i>): Morphology, digestive, excretory, reproductive system and development Cyclostomata: External features of <i>Petromyzon</i> and <i>Myxine</i> ; Comparison between Lampreys and Hagfishes	8	
Unit III	Pisces: General characters of cartilaginous and bony fish; Dipnoi: Distribution, General characters, and affinities; External features, Digestive, Respiratory and Urinogenital system of <i>Scoliodon</i> ; Scales and fins of fishes, respiratory organs in fish	8	
Unit IV	Amphibia: General characters and classification, Elementary idea of parental care Reptilia: Terrestrial Adaptations; General characters and distribution, Poisonous and non-poisonous snakes; Biting mechanism in snakes; Venom and Anti venom	8	
Unit V	General characters; Morphology, Digestive, Respiratory and Urinogenital System of <i>Columba</i> ; Feathers in Birds; Aerial adaptations in birds, Mammalia: General organization, salient features and distribution of Prototheria, Metatheria an Eutheria	12	
Suggested Readings:			
1. Barnes, RD (1980); Invertebrate Zoology (4th ed.), Holt-Saunders. 2. Barrington, EJW (1987) Invertebrate Structure and Function, Nelson 3. Hickman, Roberts & Hickman (1984) Integrated Principles of Zoology, 7th ed Times-Mirror, Mosby 4. Iyer (1973) A Manual of Zoology, Part I. Viswanathan. 5. Kotpal, RL (2019) Modern Text Book of Zoology: Invertebrates, Rastogi Publications, 12th ed, 6. Marshall & William (1972.) Text Book of Zoology, Vol I (Parker & Haswell, 7th ed.) Macmillan,			
Course prerequisite: To study this course, the students must have had subject biology in class 12 th			
Suggested continuous Evaluation methods-			
Continuous internal Evaluation shall be based on allotted assignments and class text.			
The marks shall be as follows: Internal examination :10 Assignment/Practical/Project : 5 Attendance/Behaviour : 5			

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. First Year	Semester: II
Pedagogy:			
Course Code: ZOO-23102L		Course Title: Lab work on Animal Diversity-II	
Course Outcome: After completing this course, the students will be able to -			

CO1. Practical understanding through Virtual dissection CO2. Prepare permanent slides and museum conservations. CO3. Know about Taxonomic identification and characteristic features. CO4: Know about permanent slide preparation		
Credit (L+T+P): 0+0+2		Paper: Core Compulsory
Max. Marks: 20+80		Min Passing Marks: 7+29
Total Number of Lectures (Lecture +Tutorials + Practical): 0+0+60		
Unit:	Topics	No. of Practical (Hrs)
	Study of museum specimens/slides:	60
Museum Speciation Protochordata : <i>Herdmania, Amphioxus</i> Cyclostomes : <i>Petromyzon, Ammocoete larva, Myxine</i> Pisces : <i>Trygon, Pristis, Torpedo, Protopterus, Hilsa, Labeo, Wallago, Exocoetus, Hippocampus, Anabas, Chiemera, Diodon, Synaptura, Echeneis, Tetradon</i> Amphibia: <i>Ichthyophis, Ambystoma, Axolotl larva, Salamendra, Amphiuma, Proteus</i> Reptilia : <i>Chelone, Testudo, Sphenodon, Chaemeleon, Phrynosoma, Draco, Iguana, Haloderma, Typhlops, Python, Bangarus, Naja, Hydrophis, Viper, Natrix, Crotalus</i> Aves : <i>Pigeon, Fowl, Chick, W.M. Flight Feather</i> Mammals : <i>Hedgehog, Manis, Hystrix, Bat</i> Permanent Slides Protochordata : W.M. <i>Salpa, Doliolum</i> , T.S. of <i>Amphioxus</i> , Spicules of <i>Herdmania</i> . Amphibia : V.S. of Skin, T.S. through alimentary canal, C.S. of Liver, C.S. of Lung, T.S. of Kidney, T.S. of gonads. Aves : W.M. of filoplumes, W.M. of down feather Mammals : V.L.S. through Skin, T.S. of Liver, T.S. of Lung, T.S. of Kidney, T.S. of Gonads. Permanent Slide preparation: Ampulla of Lorenzini, Placoid scales. Striated and unstriated muscles Virtual dissection: https://www.vlab.co.in , www/onlinelab.in , https://vlab.amrita.edu		
Suggested Readings:		
1.	Practical Zoology	- Robert William Hegner
2.	Vertebrate Practical	- P.S. Verma
3.	Vertebrate Practical	- S.S. Lal
4.	Vertebrate Practical	- Asthana, Agrawal and Jindal, Pragati Prakashan
5.	Vertebrate Practical	- O.P. Saxena
Suggested continuous Evaluation methods-		
Continuous internal Evaluation shall be based on allotted assignments and class text.		
The marks shall be as follows:		
Internal examination	:	10
Assignment/Practical/Project	:	5
Attendance/Behaviour	:	5

Other Courses:

Minor : To be Chosed from POOL B

Skill Enhancement Course (SEC) : To be Chosed from POOL C

Value Added Course : To be Chosed from POOL D

EXIT OPTION: Undergraduate Certificate (in the field of learning/discipline) for those who exit after the first year (two semesters) of the undergraduate programme. (Programme duration: first year or two semesters of the undergraduate programme) [NSQF Level 5]

SEMESTER-III

Programme: B.Sc. (Honours/Honours with Research) in Zoology	Year: BSc. Second Year	Semest er: III
--	-------------------------------	-----------------------

Pedagogy:		
Course Code: ZOO-23103		Course Title: Cell Biology, Molecular Biology & Instrumentation
Course Outcome: After completing this course, the students will be able to -		
CO.1 Students will understand cell theory & cell organelles CO.2 They will know about DNA and their genetic role in the organism CO.3 They will understand RNA and their role the organism. CO.4 Students will understand the genetic regulation in eukaryote and prokaryote. CO.5 Students will understand the various instruments and their function.		
Credit (L+T+P): 2+0+2		Paper: Core Compulsory
Max. Marks: 20+80		Min Passing Marks: 7+29
Total Number of Lectures (Lecture +Tutorials +Practical): 30+0+60		
Unit:	Topics	No. of Lecture
Unit I.	Introduction to Cell theory; Comparison of a generalised Pro- & Eukaryote cell. Structure & function of plasma membrane, cytoplasm; Introduction to the Cell organelles: Endoplasmic reticulum, Golgi, complex, Lysosome, Nucleus & Nucleolus; Ribosome; Mitochondria & cytoskeleton, Cell Division	6
Unit II	DNA as genetic material: Structure of DNA, Types of DNA; Replication of DNA: DNA polymerases; primosome, replisome, Rolling circle replication, Unique aspects of eukaryotic chromosome replication, DNA damage, types of damage, mechanism and types of DNA repair	6
Unit III	RNA structure and types of RNA: Transcription and Translation in prokaryotes and eukaryotes -RNA polymerase, role of sigma factor, promoter, Initiation, elongation and termination of RNA chains; RNA splicing and processing	5
Unit IV	Regulation of gene expression and translation: Regulation of gene expression in prokaryotes- Operon concept (inducible & repressible system), Genetic code & its characteristics; aminoacyl tRNA synthetases, Mechanism of initiation, elongation and termination of polypeptides	8
Unit V	Light & Phase Contrast Microscopy, Confocal and Electron Microscopy, (TEM & SEM), Principles and applications of pH meter, centrifuge, Electrophoresis, Chromatography	5
Suggested Readings:		
1. Alberts et al.: Molecular Biology of the Cell, Garland Pub., New York, 1989. 2. DeRobertis & DeRobertis: Cell & Molecular Biology, 1996 3. Friefelder: Molecular Biology. Narosa Publ. House, 1996 4. Sharma, V.K.: Techniques in Microscopy and Cell Biology, Tata McGraw Hill, 1991 5. Verma, P.S. et al. Cell Biology, Genetics, Molecular biology, Evolution and Ecology (S.Chand 6. Pandey, B.N. B.Sc. Zoology Series: Cytology, Genetics and Molecular Genetics. Tata McG Hill,		
Course prerequisite: To study this course, the students must have had subject biology in class 12 th		
Suggested continuous Evaluation methods-		
Continuous internal Evaluation shall be based on allotted assignments and class text.		
The marks shall be as follows: Internal examination :10 Assignment/Practical/Project : 5 Attendance/Behaviour : 5		

Programme: B.Sc. (Honours/Honours with Research) in Zoology	Year: BSc. Second Year	Semester: III
Pedagogy:		
Course Code: ZOO-23103L	Course Title: Lab work based on theory	
Course Outcome: After completing this course, the students will be able to -		

CO.1 Student will practically understand about cell and organelles.
 CO. 2 Student will understand the cell division process by practical
 CO. 3 To know DNA isolation by practical method.
 CO. 4 To know electrophoresis techniques.
 CO. Diagrammatic study of transcription and translation.

Credit: 0+0+2

Paper: Core Compulsory

Max. Marks: 20+80

Min Passing Marks: 7+29

Total Number of Lectures (Lecture +Tutorials +Practical): 0+0+60

Unit:	Topics	No. of Practical (Hrs)
	1. Photographs of prokaryotic cell 2. Photographs of cell organelles 3. Stages of Mitosis by squash technique 4. Photographs of structure of DNA, RNAs 5. Diagrams of translation, transcription 6. Preparation of solutions for Molecular Biology experiments. 7. Isolation of chromosomal DNA from bacterial cells. 8. Isolation of Plasmid DNA by alkaline lysis method 9. Agarose gel electrophoresis of genomic DNA & plasmid DNA 10. Preparation of restriction enzyme digests of DNA samples 11. Demonstration of AMES test or reverse mutation for carcinogenicit	60

Suggested Readings:

1. Alberts et al.: Molecular Biology of the Cell, Garland Pub., New York, 1989.
2. DeRobertis & DeRobertis: Cell & Molecular Biology, 1996
3. Biological Instrumentation and Methodology (Tools & Techniques) S Chand & Co Ltd
4. Sharma, V.K.: Techniques in Microscopy and Cell Biology, Tata McGraw Hill, 1991
5. Pandey, B.N. B.Sc. Zoology Series: Cytology, Genetics and Molecular Genetics. Tata McGraw Hill, 2012,

Course prerequisite: To study this course, the students must have had subject biology in class 12th

Suggested continuous Evaluation methods-

Continuous internal Evaluation shall be based on allotted assignments and class text.

The marks shall be as follows:

Internal examination :10
 Assignment/Practical/Project : 5
 Attendance/Behaviour : 5

Programme: B..Sc. (Honours/Honours with Research) in Zoology	Year: Second Year	Semester: III
Pedagogy:		
Course Code: ZOOIKS-2302	Course Title: Applied IKS-1 : Zoology	
Course Outcome: After completing this course, the students will be able to -		
<p>CO1. Demonstrate Understanding of Indian Philosophical Perspectives: Students should be able to explain key philosophical concepts from Indian traditions, such as interconnectedness, dharma, and ahimsa (non-violence), and understand how these concepts relate to the study and treatment of animals in the field of zoology.</p> <p>CO2. Integrate Traditional Wisdom with Modern Zoological Concepts: Students should be able to identify points of convergence between traditional Indian knowledge systems and modern zoological concepts, illustrating how indigenous wisdom can enrich our understanding of animals, ecosystems, and biodiversity.</p> <p>CO3. Apply Ethical Frameworks to Zoological Studies: Students should be able to analyze ethical dilemmas in zoological research, conservation, and practices through the lens of Indian ethical philosophies. They should be able to propose solutions that align with both scientific rigor and cultural values.</p> <p>CO4. Critically Evaluate Representations of Animals in Indian Culture: Students should be able to critically examine how animals are represented in Indian art, literature, and religious texts, and understand how these representations influence societal perceptions, conservation efforts, and ethical considerations related to animals.</p> <p>CO5. Synthesize Comprehensive Views on Animal Welfare: Students should be able to synthesize multidisciplinary perspectives, combining zoological knowledge with insights from Indian knowledge systems, to formulate holistic approaches to animal welfare, conservation, and sustainable interactions with animals.</p>		
Credit: 3+0+0	Paper: Core Compulsory	
Max. Marks: 20+80	Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials +Practical): 45+0+0		
Unit:	Topics	Lectures (Hrs.)
Unit 1: Introduction to Indian Knowledge Systems		09
<ul style="list-style-type: none"> • Overview of Indian knowledge systems: Ayurveda, Yoga, Sankhya, etc. • Historical development and cultural significance. • Relevance of integrating Indian knowledge with modern zoological studies. 		
Unit 2: Ethnozoology in Indian Traditions		09
<ul style="list-style-type: none"> • Traditional uses of animals in rituals, folklore, and daily life. • Cultural practices involving animals in different regions. • Ethical considerations, conservation implications, and modern perspectives. 		
Unit 3: Zoological Concepts in Indian Texts		09
<ul style="list-style-type: none"> • Analysis of animal references in ancient Indian texts: Vedas, Puranas, etc. • Symbolism and allegorical meanings of animals in Indian literature. • Exploration of zoological observations in philosophical and cosmological contexts. 		
Unit 4: Ayurveda and Animal Health		09
<ul style="list-style-type: none"> • Introduction to Ayurvedic principles and classification of living beings. • Ayurvedic insights into animal physiology, health, and diseases. • Case studies: Traditional Ayurvedic treatments for animals. 		
Unit 5: Yoga and Animal Behavior		09
<ul style="list-style-type: none"> • Exploring connections between yoga, meditation, and animal behavior. • Influence of yogic practices on human-animal interactions and ethology. • Yogic principles applied to understanding animal cognition. 		

Suggested Readings:

- "Srimad Bhagavad Gita" - The Bhagavad Gita contains philosophical insights that could be applied to the study of zoology, particularly in understanding the interconnectedness of life and the ethical implications of studying and interacting with animals.
- "The Web of Life: A New Scientific Understanding of Living Systems" by Fritjof Capra - While not specifically about Indian knowledge systems, this book explores the interconnectedness of life and ecosystems, which could align with some Indian philosophies.
- "The Knowledge Book: Key Concepts in Philosophy, Science and Culture" by National Book Trust - This book provides an overview of various philosophical and cultural concepts, including some from Indian traditions, which could be used to contextualize zoological concepts.
- "Indian Zoology: Humane Approach" by Ramesh Gupta - This book discusses zoology with a focus on ethical and humane treatment of animals, which could resonate with Indian philosophical perspectives.
- "Ethics for Our Times: Essays in Gandhian Perspective" by M.M. Verma - This book delves into ethics from a Gandhian viewpoint and could be used to explore ethical considerations in zoology from an Indian perspective.

Course prerequisite: To study this course, the students must have had subject biology in class 12th

Suggested continuous Evaluation methods-

Continuous internal Evaluation shall be based on allotted assignments and class text.

The marks shall be as follows:

Internal examination	:10
Assignment/Practical/Project	: 5
Attendance/Behaviour	: 5

ELECTIVE (MINOR) FOR OTHER THAN ZOOLOGY DISCIPLINE ANY ONE

Programme: B.Sc. (Honours/Honours with Research) in Zoology	Year: Second Year	Semester: III
Pedagogy:		
Course Code: From POOL B	Course Title: Elementary Cell Biology and Molecular Biology -I	
Course Outcome: After completing this course, the students will be able to -		
CO.1 Student will know about differentiate between prokaryotes and eukaryotes cells and functions		
CO.2 To understand the importance of the nucleus and components.		
CO.3 To understand how the endoplasmic reticulum and Golgi apparatus interact with one another and know with which other organelles they are associated		
CO.4 To understand structure and functions of DNA and RNA.		
CO. 5. To understand gene and its function and also gene expressions in various models		
Credit: 02	Paper: Elective (Minor)	
Max. Marks: 20+80	Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 30		
Unit	Topics	No. of Lecture
Unit I	Introduction to Cell theory; Comparison of a generalised Pro & Eukaryote cell.). Elementary knowledge of the structure & function of plasma membrane, cytoplasm	8
Unit II	Introduction to the organelles constituting endomembrane system (Endoplasmic reticulum, Golgi complex, Lysosome, Peroxisome	8
Unit III	DNA as genetic material: Structure of DNA, Types of DNA; Replication of DNA in prokaryotes and eukaryotes:	8
Unit IV	Semiconservative nature of DNA replication, Bi-directional replication, DNA polymerases; primosome, replisome	6

Suggested Readings:

1. Alberts et al.: Molecular Biology of the Cell, Garland Pub., New York, 1989.
2. DeRobertis & DeRobertis: Cell & Molecular Biology, 1996
3. Friefelder: Molecular Biology. Narosa Publ. House, 1996
4. Sharma, V.K.: Techniques in Microscopy and Cell Biology, Tata McGraw Hill, 1991
5. Verma, P.S. & Agarwal, V. K. Cell Biology, Genetics, Molecular biology, Evolution and Ecology (S Chand.)
6. Power C.B.

Course. prerequisite: To study this course, the students must have had subject biology in class 12th

Suggested continuous Evaluation methods-

Continuous internal Evaluation shall be based on allotted assignments and class text.

The marks shall be as follows:

Internal examination :10

Assignment/Practical/Project : 5

Attendance/Behaviour : 5

Other Courses:

Minor : To be Chooosed from POOL B

Skill Enhancement Course (SEC) : To be Chooosed from POOL C

Value Added Course : To be Chooosed from POOL D

SEMESTER-IV

Programme: B..Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. Second Year	Semester: IV
Pedagogy:			
Course Code: ZOO-23104		Course Title: Physiology and Elementary Biochemistry	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Student will understand physiological activity of the various system of the body			
CO.2 Student will understand respiration and excretory system			
CO.3 Student will understand blood groups and reproductive biology			
CO. 4 They will understand about food and their enzymatic functions and also mechanism			
CO.5 They will also understand about the metabolism of various types of food items.			
Credit (L+T+P) : 3+0+2		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 45+0+60			
Unit	Topics	No. of Lecture	
Unit I	Introduction of Nervous system, Structure of a neuron, Types of neurons; Introduction of muscle, types of muscle, Ultrastructure of skeletal muscle, muscle contraction. Digestive system: component of alimentary canal, digestive enzymes, mechanism of digestion, absorption of carbohydrates, proteins, lipids.	9	
Unit II	Respiratory system: structure of respiratory tract; gaseous exchange, transport of oxygen and carbon dioxide in blood. Excretory system: Structure of nephron, mechanism of urine formation, regulation, micturation	9	
Unit III	Circulatory system: Composition of Blood, Blood clotting, Rh factor, ABO blood group, Lymph, Homeostasis, Heart structure, Origin and conduction of the cardiac impulse, cardiac cycle. Endocrine system: Introduction of endocrine gland, structure and function of pituitary, thyroid, parathyroid, pancreas, adrenal and gonads' Reproductive physiology of male and female fertility	11	
Unit IV	Introduction to Biomolecules: Carbohydrates, Proteins, Lipids: structure, types and functions. Introduction to Enzymology: Mechanism of action, Kinetics, inhibition and regulation	7	
Unit V	Introduction to metabolism of Carbohydrate, Protein and Lipids: Glycolysis, Kreb's cycle, pentose phosphate pathway, glycogen metabolism, electron transport chain, transamination, deamination, urea cycle, β - oxidation in fatty acids	9	

Suggested Readings:

1. Berg, J. M., Tymoczko, J. L. and Stryer, L. (2006). Biochemistry. VI Edition. W.H. Freeman and Co.
2. Hall, John E. (2015). Guyton and Hall Textbook of Medical Physiology, W.B. Saunders Company
3. Jain, A.K. (2018). Textbook of Physiology, Arya Publications B.Sc. Second Year (IV Semester) 14
4. Nelson, D. L., Cox, M. M. and Lehninger, A.L. (2009). Principles of Biochemistry. IV Edition. W.H Freeman
5. Singh, HR and N. Kumar Animal Physiology and related Biochemistry, SL, Nagin Chand and Co, Delhi
6. Tortora, G.J. & Derrickson, B.H. (2009). Principles of Anatomy and Physiology, 12th edn., John Wiley &
7. Widmaier, E.P., Raff, H. & Strang, K.T. (2008) Vander's Human Physiology, 11th edn., McGraw Hill

Course prerequisite: To study this course, the students must have had subject biology in class 12th

Suggested continuous Evaluation methods-

Continuous internal Evaluation shall be based on allotted assignments and class text.

The marks shall be as follows:

Internal examination :10

Assignment/Practical/Project : 5

Attendance/Behaviour : 5

Programme: B..Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. Second Year	Semester: IV
Pedagogy:			
Course Code: ZOO-23104L		Course Title: Lab work based on theory	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Students will know how to prepare slide of haemin crystal CO. 2 Study of permanent slides of various organ parts of the Chordate body CO.3 Photographic /model exercise to understand heart and nervous. CO. 4 Identification of unknown carbohydrates in given solutions. CO.5 To understand enzymatic functions with enzymatic exercise			
Credit: 0+0+2		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 0+0+60			
Unit:	Topics	No. of Practical (Hrs)	
	1. Preparation of hemin crystals 2. Examination of permanent histological sections of mammalian pituitary, thyroid, parathyroid, pancreas, adrenal 3. Examination of permanent slides of spinal cord, duodenum, liver, lung, kidney, bone, cartilage, blood cells 4. Models/ Photographs: Structure of neuron, types and structure of muscles, structure of heart 5. Charts/ Photographs: Glycolysis, Krebs's cycle, electron transport chain B. BIOCHEMISTRY 1. Identification of unknown carbohydrates in given solutions (Starch, Sucrose, Lactose, Galactose, Glucose, Fructose) 2. Colour reactions to identify functional group in the given solution of proteins 3. Study of activity of salivary amylase under optimum condition.	60

SEMESTER-V

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. Third Year	Semester: V
Pedagogy:			
Course Code: ZOO-23105		Course Title: Applied Zoology	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Student will understand epidemiology of disease and its transmission CO.2 Student will know about various protozoan diseases and their impact. CO.3 Student will know about the heminthes dieses on human health CO.4 They will able to learn about the insects with medical role. CO.5 They will learn about fish technology, poultry and aquaculture			
Credit: 2+0+2		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 30+0+60			
Unit	Topics	No. of Lecture	
Unit I	Introduction to Host-parasite relationship: Definitive host, Intermediate host, Parasitism, Symbiosis, Commensalism, Reservoir, Epidemiology of Diseases: Transmission, Prevention and control of diseases, Covid-19	6	
Unit II	Rickettsiae and Spirochaetes: Brief account of Rickettsia prowazekii, Borrelia recurrentis and Treponema pallidum Parasitic Protozoa: Life history and pathogenicity of <i>Entamoeba histolytica</i> , <i>Plasmodium vivax</i> , <i>Leishmania donovani</i> and <i>Trypanosoma gambiense</i> , Ichthyophthirius in fish	5	
Unit III	Parasitic Helminthes: Life history and pathogenicity of <i>Ancylostoma duodenale</i> and <i>Wuchereria bancrofti</i> . Parasitic Zoonosis (Protocephalasis), <i>Trichinalla spiralis</i> , Multiple Binary fission, Cutaneous larva migrans	7	
Unit IV	Economic Importance of insects: Biology Control and damage caused by <i>Pyrilla perpusilla</i> and <i>Papilio demoleus</i> , <i>Callosobruchus chinensis</i> and <i>Sitophilus oryzae</i> . Insects of Medical Importance: Life cycle, medical importance and control of <i>Pediculus humanus corporis</i> , Animal Husbandry: Domestic animals of economic importance; Preservation and artificial insemination in cattle, Myiasis; Role of Aedes in Lymphatic filariasis	6	
Unit V	Poultry Farming: Principles of poultry breeding, Management of breeding stock and broilers, Processing and preservation of eggs Fish Technology: Genetic improvements in aquaculture industry;	6	
Suggested Readings:

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. Third Year	Semester: V
Pedagogy:			
Course Code:		Course Title: Lab work based on theory	
Course Outcome: After completing this course, the students will be able to -			
CO.1 student will learn about practical knowledge on various protozoan and helminths disease. CO.2 Student will study about the disease-causing vectors CO.3 Student will know about the stored grain pest and their slides. CO.4 Student will know about the economic importance of the various insects. CO.5 Student will learn by field visit to various industry and centre.			
Credit: 0+0+2		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials +Practical): 0+0+60			
Unit:	Topics	No. of Practical (Hrs)	
	1. Study of <i>Plasmodium vivax</i> , <i>Entamoeba histolytica</i> , <i>Trypanosoma gambiense</i> , <i>Ancylostoma duodenale</i> , <i>Leishmania donovani</i> and <i>Wuchereria bancrofti</i> and their life stages through permanent slides/photomicrographs or specimens. 2. Study of arthropod vectors associated with human diseases: <i>Pediculus</i> , <i>Culex</i> , <i>Anopheles</i> , <i>Aedes</i> and <i>Xenopsylla</i> . 3. Study of insect damage to different plant parts/stored grains through damaged products/photographs. 4. Identifying feature and economic importance of <i>Helicoverpa armigera</i> , <i>Papilio demoleus</i> , <i>Pyrilla perpusilla</i> , <i>Callosobruchus chinensis</i> , <i>Sitophilus oryzae</i> and <i>Tribolium castaneum</i> 5. Visit to poultry farm or animal breeding centre and submission of visit report. 6. Preparation and maintenance of freshwater aquarium.	60

Programme: B..Sc. (Honours/Honours with Research) in Zoology	Year: Third Year	Semester: V
Pedagogy:		
Course Code: ZOOIKS-2303	Course Title: Applied IKS-2 : Zoology	
Course Outcome: After completing this course, the students will be able to -		
CO.1 CO. 2 CO. 3 CO. 4 CO. 5.		
Credit: 3+0+0	Paper: Core Compulsory	
Max. Marks: 20+80	Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials +Practical): 45+0+0		
Unit:	Topics	Lectures (Hrs.)
Unit 1: Indigenous Knowledge in Biodiversity Conservation		9
<ul style="list-style-type: none"> Traditional ecological knowledge and its relevance to biodiversity conservation. Case studies: Successful conservation initiatives rooted in Indian knowledge. Ethical dimensions of incorporating indigenous wisdom. 		
Unit 2: Ethical and Philosophical Aspects		9
<ul style="list-style-type: none"> Exploring the ethical treatment of animals in Indian traditions. Philosophical viewpoints on animal rights and duties towards animals. Comparative analysis of Western and Indian ethical perspectives. 		
Unit 3: Ayurveda and Modern Veterinary Science		9
<ul style="list-style-type: none"> Comparative study of Ayurvedic and modern approaches to animal healthcare. Challenges and opportunities in integrating traditional wisdom with modern practices. Case studies: Collaborative efforts between Ayurvedic and veterinary experts. 		
Unit 4: Contemporary Applications in Zoology		9
<ul style="list-style-type: none"> Contemporary research integrating Indian knowledge systems with zoology. Case studies: Applications in animal behavior, conservation, and ecology. Exploring the potential for interdisciplinary collaboration. 		
Unit 5: Field Studies and Student Projects		9
<ul style="list-style-type: none"> Field trips to study ethnozoological practices and traditional ecological knowledge. Student projects: Documentation of local practices, analysis, and presentations. Reflection on the implications of Indian knowledge in modern zoology. 		
Suggested Readings:		
<ul style="list-style-type: none"> "Srimad Bhagavad Gita" - The Bhagavad Gita contains philosophical insights that could be applied to the study of zoology, particularly in understanding the interconnectedness of life and the ethical implications of studying and interacting with animals. "The Web of Life: A New Scientific Understanding of Living Systems" by Fritjof Capra - While not specifically about Indian knowledge systems, this book explores the interconnectedness of life and ecosystems, which could align with some Indian philosophies. "The Knowledge Book: Key Concepts in Philosophy, Science and Culture" by National Book Trust - This book provides an overview of various philosophical and cultural concepts, including some from Indian traditions, which could be used to contextualize zoological concepts. 		

- "Indian Zoology: Humane Approach" by Ramesh Gupta - This book discusses zoology with a focus on ethical and humane treatment of animals, which could resonate with Indian philosophical perspectives.
- "Ethics for Our Times: Essays in Gandhian Perspective" by M.M. Verma - This book delves into ethics from a Gandhian viewpoint and could be used to explore ethical considerations in zoology from an Indian perspective.

Course prerequisite: To study this course, the students must have had subject biology in class 12th

Suggested continuous Evaluation methods-

Continuous internal Evaluation shall be based on allotted assignments and class text.

The marks shall be as follows:

Internal examination :10

Assignment/Practical/Project : 5

Attendance/Behaviour : 5

Major (Elective): Choose Any One Course

Programme: B..Sc. (Honours/Honours with Research) in Zoology		Year: Third Year	Semester: V
Pedagogy:			
Course Code: ZOO-23106A		Course Title: Environmental Biology	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Know about pollution and its impact on human health CO.2 Know about various kinds of natural resources CO.3 Understand about biodiversity concept and its role in environment CO.4 Know about various kinds of techniques for environment conservation CO.5 Know solid –waste management and its role			
Credit: 3+0+0		Paper: Elective (Major)	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 45+0+0			
Unit	Topics	No. of Lecture	
Unit I	Environmental Pollution – Definition, Type and control measures. Source of water, air, soil and noise pollution and their control measure. Greenhouse effect, Global warming, Acid rain and ozone layer depletion	9	
Unit II	Conventional and non-conventional sources of energy; types and application, Environment and human health, Water quality assessment, oligotrophic, mesotrophic and eutrophic condition of water bodies water borne diseases	9	
Unit III	Environmental hazards of radiations and safety measures, Environmental Impact Assessment, Hydroelectric Project, Ecosystem services, Bio-indicators: Diatom, Benthic macroinvertebrate	10	
Unit IV	Biodiversity: Types of biodiversity, measurement of biodiversity, evenness, Hotspots; Threats to biodiversity,	6	
Unit V	Biodegradation: definition and importance, Biomagnifications; definition and importance, Bioremediation; Biodegradation: definition and importance, Solid waste management: Causes, effects and control measures,	11	
Suggested Readings:			
1 1. Willimer, Stone & Stone: Environmental Physiology (Blackwell Sci. Oxford 4K) 2. Singh H.R. - Ecology & Environmental Science 3. Sharma P.D. - Environmental Biology and toxicology 4. Introduction to instrumental analysis - Robert Brown, Mc.Graw Hill, International Edition

SEMESTER-VI

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. Third Year	Semester: VI
Pedagogy:			
Course Code: ZOO-23107		Course Title: Endocrinology and Animal Behaviour	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Student will know about the various endocrine gland and their function. CO.2 Student will be known about the mechanism of hormones. CO.3 Student will know about the reproductive cycle and neural regulation. CO.4 Student will know about the behavioural study of animals. CO.5 Student will know about the various types of behaviour and chemical role.			
Credit: 3		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 3+0+0			
Unit	Topics	No. of Lecture	
Unit I	Endocrine messengers: Hormones, neurohormones, hormone like substances (neuronal peptides, pheromones, neurosecretion. Hormones and Physiological actions of the endocrine glands in mammals: Pituitary, Thyroid, parathyroid, Pancreas, Gastro-intestinal tract, Adrenal gland, Thymus & Pineal.	9	
Unit II	Mechanism of action of Protein hormones and Catecholamines: membrane bound receptors, Cyclic nucleotide cascade Organisation & physiological actions of the Testis: Androgen binding protein (ABP), Inhibin.	8	
Unit III	Neuroendocrine control of testicular functions (Gn RH regulation, FSH- effects on germinal epithelium, LH-effects on Leydig cells, negative feedback regulation), Folliculogenesis, Ovulation, Luteinization, Ovarian cycles; Seasonal reproductive cycles.	8	
Unit IV	Animal behaviour: scope and terminology. Instinct and learning behaviour: Definition, characteristics and types. Imprinting. Instinct versus learning behaviour. Timing of behaviour: Biological rhythms. The Biological Clock. Circadian rhythms and their synchronisation seasonal rhythms. Photoperiodism	11	
Unit V	Communication: Visual, olfactory, acoustic (bird songs, amphibian calls); echolocation in bats, Chemoreception: Chemicals (pheromones) as signals in insects and mammals. Neural control of drinking, learning, eating, activity & rest, sexual behaviour. Hormonal Control of behaviour	9

Course Code: ZOO-23111B		Course Title: Applied Environmental Biology [For Students pursuing Honours in the discipline]	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Understand and environmental flow and its role in the river ecosystem. CO2. To understand environmental management about the changes in the environmental. CO3. To understand environmental Impact Assessment and its importance. CO4. To know about Hydroelectric Projects and role. CO5.To know Biodiversity act and regulations			
Credit: 4		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 4+0+0			
Unit	Topics	No. of Lecture	
Unit I	Environmental flow: Definition and types, flow Assessment methodology, Steps of flow assessment, Reconnaissance/Survey Scoping, Pre -feasibility Steps, Feasibility Steps, Design & Constructions, Operation	16	
Unit II	Components of the EFA: Hydrology, Fluvial Geomorphology and hydraulic modeling Habitat preferences, Economic and Livelihood, Assessment of Cultural & Spiritual, Water Quality and Pollution	12	
Unit III	Environmental management Programme (EMP): Definition, types of EMP, Legal enforceability of EMP, Integration part of EMP, Public involvement	10	
Unit IV	Hydroelectric Projects (HEP): concept and definition, Purpose of Study, Steps of study, Scientific and socioeconomic aspect, HEPs in India and their role in economy, public participation in HEPs	12	
Unit V	Environmental Impact Assessment (EIA); definition, objectives, Role of EIA in sustainable development of environment, Methodology, data collection, analysis of data, report writing, and recommendations	10	
Suggested Readings:			
8. Anti – Pollution Acts (3) and Commentaries published theorem. 9. Constitution of India [Referred articles from Part-III, Part-IV and Part-IV-A]. 10. Pares Distn. Environmental Laws in India (Deep. Deep, Lated edn.) 11. P. Leelakrishnan, Environmental and the last (Bullorthworths, Latold, edn.). 12. Basic environmental technology: Jerry; A. Nathanson. 13. Canter, L. W. Environmental Impact Assessment, Mc. Graw Hill Publication, New York.			
Course. prerequisite: To study this course, the students must have had subject biology in class 12 th			
Suggested continuous Evaluation methods			
Continuous internal Evaluation shall be based on allotted assignments and class text.			
The marks shall be as follows: Internal examination :10 Assignment/Practical/Project : 5 Attendance/Behaviour : 5			

ELECTIVE (MAJOR) FOR ZOOLOGY DISCIPLINE ANY TWO

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: Fourth Year	Semester: VII
Pedagogy:			
Course Code: ZOO-23112A		Course Title: Evolutionally Biology	
Course Outcome: After completing this course, the students will be able to -			
CO1. To understand the concept, process and patterns of evolution. CO2. To acquire knowledge and reasoning skills useful to interpret biological phenomena evolution. CO3. To understand how the single cell formed at fertilization forms an embryo and then a full adult organism CO4. To know variety of interacting processes. CO5. To know about an organism's heterogeneous shapes, size, and structural features,			
Credit: 2+0+2		Paper (Code compulsory/Elective): Core	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 30+0+60			
Unit	Topics	No. of Lecture	
Unit I	Historical development of the concept of evolution. Theories of organic evolution: Lamarckism (Neo-Lamarckism); Darwinism (Neo- Darwinism); Modern synthetic theory.	12	
Unit II	Evidences in favour of evolution: Comparative anatomy, Comparative Embryology, Palaeontology, Biochemistry & Genetics	10	
Unit III	Processes of Evolutionary Change: Organic variations; Isolating Mechanisms; Natural selection (Example: Industrial melanism); Types of natural selection (Directional, Stabilizing, Disruptive), Artificial selection.	14	
Unit IV	Species Concept: Biological species concept (Advantages and Limitations); Modes of speciation (Allopatric, Sympatric)	10	
Unit V	Palaeontology: Fossils and fossilization, Incompleteness of fossil record, Dating of fossils, Significance of fossil record; Geological distribution of animals; Mass extinction (Causes, five major extinctions, K-T extinction in detail), Role of extinction in evolution; Evolution of Horse	14	
Suggested Readings:			
1. Futuyma, Douglas J. and Kirkpatrick Mark. Evolution (4th Edition) Sinauer 2. Veer Bala Rastogi (2017) Organic Evolution. Med Tech 3. Darlington P.J. The Geographical Distribution of Animals, R.E. Krieger Pub. Co. 4. Darwin, Charles (2003). The Origin of Species: 150th Anniversary Edition

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: Fourth Year	Semester: VII-VIII
Subject: Zoology			
Course Code: ZOO-23112B		Course Title: Toxicology	
Course Outcome: After completing this course, the students will be able to -			
CO.1 To examine the application how xenobiotics disrupt normal cellular processes of genomics, CO2. To know use clinical and laboratory findings in the treatment of acute toxic exposures CO3. To understand the xenobiotics, their categories and effects on organisms CO4. To gain knowledge about bio-informatics and data base study of nucleic acid sequence CO.5 Know about scientific role of bioinformatics in research			
Credit: 2+0+2		Paper (Code compulsory/Elective): Core	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 30+0+60			
Unit	Topics	No. of Lecture	
Unit I	Different routes/methods of exposure, frequency & duration of exposure, Human exposure, Dose-response relationship, Selective toxicity, concept, significance Basic mechanisms of selective toxicity	10	
Unit II	Bioassay, Acute toxicity tests for terrestrial and aquatic animals, Chronic toxicity tests, Concept of maximum acceptable toxicant concentration (MATC) and safe concentration, Factors related to the chemical exposure, Surrounding medium and the organisms	14	
Unit III	Local and systemic effects, Immediate and delayed effects Reversible and irreversible effects, Biochemical and physiological effects of xenobiotics, Nanotoxicology	10	
Unit IV	Concept of bioconcentration, bioaccumulation and biomagnifications; Bioconcentration factor Process of bioaccumulation in the biological system Biotransformation of Xenobiotics, Concept of biotransformation and metabolism. Sites of biotransformation, Biotransformation enzymes and general biotransformation reactions,	15	
Unit V	Toxic effects on Digestive system, Circulatory system, Respiratory system, Excretory system, Reproductive system, Endocrine system, Nervous system, Mutagenicity, Teratogenicity, Carcinogenicity, Toxicogenomic	11	
Suggested Readings:			
1. Sharma PD (2018). Environmental Biology and Toxicology. Rastogi Publications 2. Klaassen, C. & Watkins, J. (2005) Casarett & Doull's Essentials of Toxicology, 3rd ed. Lange Publications 3. Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: Fourth Year	Semester: VII
Pedagogy:			
Course Code: ZOO-23112C		Course Title: Genetics & Cytogenetics	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Understand comprehensive and detailed understanding of the chemical basis of heredity. CO. 2 Understand about role of mutation and nucleic acid in genetics and CO. 3 Understand results of genetic experimentation in animals and cytoplasmic inheritance CO4. To understand the structure and function of the cell organelles and the process of cell division. CO5. To understand the structure of gene, Mendelian principles and learn how the information contained within them gets transferred from one generation to another.			

Credit: 4		Paper (Code compulsory/Elective): Core
Max. Marks: 20+80		Min Passing Marks: 7+29
Total Number of Lectures (Lecture +Tutorials + Practical): 4+0+0		
Unit	Topics	No. of Lecture
Unit I	Elements of Heredity and Variation. Mendel's Laws of inheritance, Linkage & type, Crossing over Sex linked inheritance: Hemophilia, Colour blindness,	12
Unit II	Sex determination: Human beings and Drosophila Blood Groups, Dosage compensation,	10
Unit III	Nucleic acids: as genetic material, Hershey - Chase & Fraenkel - Conrat experiment, Chromosome: types (polytene and lampbrush), organisation of chromatin. Heterochromatin, and euchromatin	14
Unit IV	Cell division (Mitosis and Meiosis), mitotic spindle and mitotic apparatus, chromosome movement Cell Cycle	10
Unit V	Mutation: Chromosomal mutations (deletion, duplication, inversion, translocation, aneuploidy and polyploidy), Gene mutation and mutagenesis, Cytoplasmic inheritance, Pedigree analysis, Hereditary diseases of men	14
Suggested Readings:		
1. Karp, G. (2010). Cell and Molecular Biology: Concepts and Experiments. VI Edition. John Wiley and Sons. Inc.

Attendance/Behaviour : 5		

MINOR Course for other Discipline

Programme: B.Sc. (Honours/Honours with Research) in Zoology	Year: Fourth Year	Semester: VII
Pedagogy:		
Course Code: POOL B	Course Title: Applied Zoology	
Course Outcome: After completing this course, the students will be able to -		
CO.1 Understand the life history of vectors and pests, the diseases caused and their control		
CO2. Understand the life history of parasites of domestic animals		
CO3. Gain knowledge of Agro based small Scale industries		
CO4. Study the culture of various organisms for economic benefit		
CO5. Have a broad array of career options and activities in human medicine, biomedical research and allied health professions		
Credit: 4+0+0	Paper (Code compulsory/Elective): Core	
Max. Marks: 20+80	Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 60+0+0		
Unit	Topics	No. of Lecture
Unit I	Introduction to Host-parasite relationship: Definitive host, Intermediate host	14
Unit II	Parasitism, Epidemiology of Diseases: Transmission, Covid-19	8
Unit III	Parasitic Protozoa: Life history and pathogenicity of <i>Entamoeba histolytica</i> , <i>Plasmodium vivax</i> , <i>Leishmania donovani</i> and <i>Trypanosoma gambiense</i>	16

Unit IV	Life history & Pathogenicity of <i>Trichuris trichiura</i> , Visceral Larva migrans, Bothriocephalus, Helminthes zoonoses (Cestode zoonosis, Anisakiasis)	12
Unit V	Economic Importance of insects: Biology Control and damage caused by <i>Pyrilla perpusilla</i> and <i>Papilio demoleus</i> , <i>Callosobruchus chinensis</i> and <i>Sitophilus oryzae</i> Insects of Medical Importance: medical importance and control of <i>Anopheles</i> , <i>Culex</i> , <i>Aedes</i> , Introduction of animal husbandry	10

Other Courses:

Minor : To be Chosed from POOL B

SEMESTER-VIII

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: B.Sc. Fourth Year	Semester: VIII
Pedagogy:			
Course Code: ZOO-23113		Course Title: Ecology	
Course Outcome: After completing this course, the students will be able to -			
CO.1 Student will understand the concept of ecology and its type and various ecosystems. CO.2 Student will know about various natural biogeochemical cycles and energy flow. CO.3 Student will know about the biome/biosphere and population dynamics CO.4. To understand the conservations of wild life and about endangered flora and fauna CO.5 To know about the national parks and sanctuaries and their role			
Credit: 4+0+2		Paper: Core Compulsory	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 60+0+60			
Unit	Topics	No. of Lecture	
Unit I	Ecology: Definition, aim & scope, Ecological factors: Abiotic factors, biotic factors, edaphic factors. Adaptation: Definition, types with adaptive features and example	12	
Unit II	Concept of ecosystem: Definition and types, Terrestrial and Aquatic. Energy flow in ecosystem, Food chain- grazing and detritus, Food web and trophic levels, Biogeochemical cycles, Pyramids of number, biomass and energy,	12	
Unit III	Ecological succession. Introduction to the laws of limiting factors Liebig's law of minimum and Shelford's law of tolerance, Biosphere: Hydrosphere, Lithosphere and Atmosphere.	11	
Unit IV	Biogeochemical cycles: Carbon and Nitrogen cycles. Population: Definition & characteristics: density, natality, mortality, migration, emigration and immigration, growth and growth-curves. Bio invasion and Bio-invasive species, Salinity gradients influencing pathways of bio-invasion	14	
Unit V	Dispersion and aggregation. Negative and positive, interactions including commensalism, mutualism, predation, competition and parasitism, Bioindicators & Accumulator effectors, Bioremediation	11	
Suggested Readings:			
1.E.P. Odum and Grey W. Barrett (1971) : Fundamental of Ecology, Saunders 2. C.J. Krebs (2016). Ecology: The experimental analysis and distribution and abundance. Pearson Education. 3.T.M. Smith and R.L. Smith (2014). Elements of Ecology, Pearson, Education. 4. Singh H.R. : Ecology & Environmental Science. Narendra Publication, New Delhi 5. Karmoond: Concept of Ecology

MAJOR (Elective) : Choose Any Two Courses

Programme: B.Sc. (Honours/Honours with Research) in Zoology		Year: Fourth Year	Semester: VII-VIII
Pedagogy:			
Course Code: ZOO-23114A		Course Title: Parasitology	
Course Outcome: After completing this course, the students will be able to -			
CO.1 To identify the most common parasites of medical and veterinary importance. CO2. To discuss the parasite-host relationship CO3. To describe the effects parasites have on their hosts. CO4. To describe the basic biology, life history, physiology, immunology CO5. To know about ecology of selected parasites.			
Credit: 2+0+2		Paper (Code compulsory/Elective): Core	
Max. Marks: 20+80		Min Passing Marks: 7+29	
Total Number of Lectures (Lecture +Tutorials + Practical): 30+0+60			
Unit	Topics		No. of Lecture

Unit I	Introduction to Parasitology, General introduction; Basic definitions and concepts, Types of hosts and parasites, Types of parasite associations (phoresy, symbiosis, mutualism, symbiosis, parasitism), Classification of Cestodal Nematoda up to orders	6
Unit II	Morphology, biology, lifecycle and control of protozoan and arthropod parasites, Parasitic protozoans: <i>Entamoeba</i> , <i>Giardia</i> , <i>Plasmodium</i> , <i>Trypanosoma</i> , Parasitic arthropods, Ticks and mites, Sucking lice, Crustaceans & parasitic castration	6
Unit III	Morphology, biology, lifecycle and control of helminth parasites, Parasitic trematodes (<i>Fasciola</i> , <i>Schistosoma</i>), Parasitic cestodes (<i>Echinococcus</i>), Parasitic nematodes (<i>Wuchereria bancrofti</i> , <i>Ancylostoma</i> , <i>Bothriocephalus</i>)	6
Unit IV	Physiology and ecology of parasites (Micro -& Macro-environment of parasite), Parasitic adaptations in Trematodes & Cestodes, Parasitic immunity and immune response, Host defence. Larval forms in Trematodes & Cestodes	6
Unit V	Parasite immune evasion, Parasitic granuloma, General concepts on parasite ecology, co-evolution of hosts and parasites. Population and community ecology, Parasites as bioindicators	6

Suggested Readings:		
<ol style="list-style-type: none"> "Research Design: Qualitative, Quantitative, and Mixed Methods Approaches" by John W. Creswell and J. David Creswell This book covers various research designs and approaches, helping you select the most appropriate one for your dissertation. It's suitable for both qualitative and quantitative research. "The Craft of Research" by Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams This book is a comprehensive guide to the research process, from formulating research questions to presenting findings. It offers practical advice and strategies for effective research. "How to Write a Better Thesis" by David Evans, Paul Gruba, and Justin Zobel Geared towards graduate students, this book provides practical guidance on planning, writing, and revising a thesis or research project. It covers a range of disciplines and research methods. "Completing Your Qualitative Dissertation: A Roadmap from Beginning to End" by Linda Dale Bloomberg and Marie F. Volpe Focused on qualitative research, this book offers step-by-step guidance on the entire dissertation process, including choosing a topic, data collection, analysis, and writing. "Writing Your Dissertation in Fifteen Minutes a Day" by Joan Bolker This book offers practical strategies to help you overcome writer's block and procrastination while writing your dissertation. It emphasizes consistent writing habits. "The Dissertation Journey: A Practical and Comprehensive Guide to Planning, Writing, and Defending Your Dissertation" by Carol M. Roberts This book provides a holistic approach to the dissertation process, covering topics such as time management, literature review, research design, and defense preparation. "How to Design, Write, and Present a Successful Dissertation Proposal" by Elizabeth A. Wentz Focusing on the proposal stage, this book offers guidance on crafting a clear and effective dissertation proposal, including outlining research questions and methodologies. "Writing the Successful Thesis and Dissertation: Entering the Conversation" by Irene L. Clark This book emphasizes the importance of contributing to the scholarly conversation in your field and provides practical advice on how to structure and present your research. "The Literature Review: Six Steps to Success" by Lawrence A. Machi and Brenda T. McEvoy A comprehensive guide to conducting a literature review, a crucial component of any research project or dissertation. "Demystifying Dissertation Writing: A Streamlined Process from Choice of Topic to Final Text" by Peg Boyle Single This book offers a straightforward and organized approach to the dissertation process, helping you break down the tasks and stay on track. 		
<u>Suggested continuous E-Valuation Methods –</u>		
<p>Continuous Internal Evaluation (CIL) Total marks for each course shall be based on internal assessment (20%) and semester end examination (80%). The internal assessment of 20% shall be distributed as under:</p> <p>(iv) Internal Class Test – 10%. (v) Assignment/Project/Practical – 5% (vi) Attendance/Behavior – 5%.</p>
